

Aqua (Scotland) Ltd – Neptune Water Systems

Aqua (Scotland) Ltd can supply a water treatment system to meet your requirements

- If you are concerned about the quality and purity of your domestic drinking water and the chemicals added by the water authorities
- If you are on spring water supplies that are prone to seasonal changes in colour and content
- If you simply don't like the chlorine odour and taste of your water.
- If you live in an area of hard water

At Aqua (Scotland) Ltd we have a range of products to suit any budget and quantity of water required from point of use to whole house.

Aqua (Scotland) Ltd manufacture bespoke systems for use in remote locations, spring / borehole fed and rain water collection systems. These units are built from parts specific to your requirements and use much larger capacity pipework and components to allow domestic level capacities and flow rates away from the main supply.

Potential uses for these systems are Mobile phone repeater stations, Forestry worker facilities, hill top facilities and any location off the mains water supply system where personnel are required to work and need sanitary and water supplies of a potable water quality.

At Aqua (Scotland) Ltd we can tailor a system to meet your requirements as a one off or in bulk.
