

Facility Upgrade, Design, Construction and Installation:

From concept to completion we remove the worry and headache from your business expansions and up-grade. Our conscientious project management team will monitor the design, fabrication, construction and installation of your facility to ensure it is delivered On-Time and On-Budget.

With Health and safety being a concern for all involved we will complete and deliver to you the scope of works and risk assessment documentation prior to starting the project. Then using our experienced in house team along with a vetted and approved list of contractors we will complete the installation work.

Prior to completion we will test, commission and certify the project.
